

V^zitor

Introduction

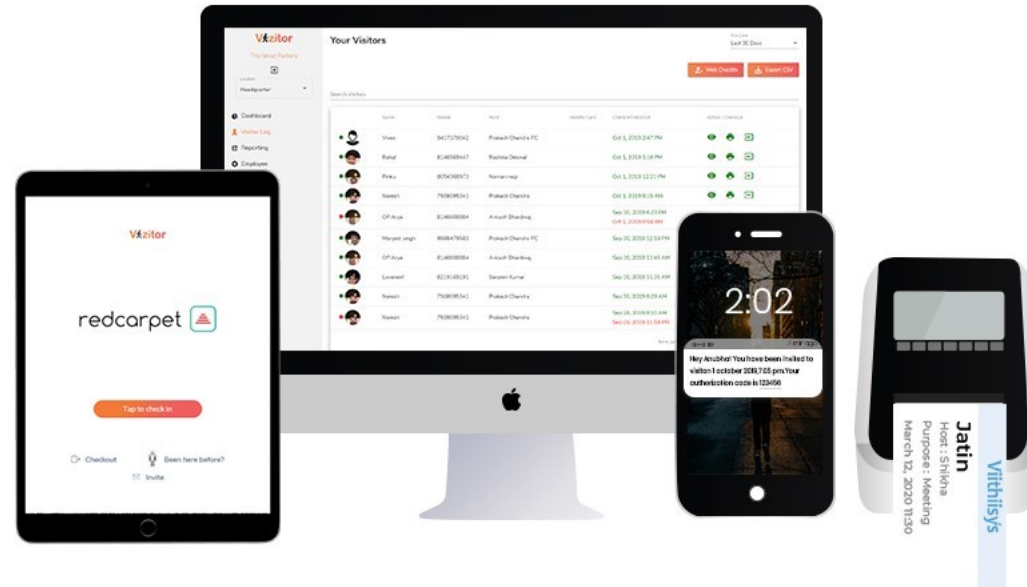

izone Africa Group, a digital-age marketing, technology and innovative solutions company, serving clients across Africa has partnered with Vizitor to launch Vizitor mobile and web solution for managing guests and employees check-in in offices, public facilities and events.

As part of izone Africa's new strategic positioning as an innovative solutions company we are bringing to the market a solution that will enhance security, efficiency and customer experience for guests and employees when accessing offices and facilities across all sectors of the economy.

A digital check-in platform built for the digital and information age...

About Vizitor

Vizitor is a smart visitor management platform that secures the whole check-in & check-out process of guests at any work-places.

The idea behind Vizitor is to make the **check-in/check-out** process entirely digital so it's convenient for repeat visitors also, at the same time making the organization data and premises secure.

Vision & Mission

Vizitor is on a mission to replace the manual process of check-ins in **100k Organisations** with a digital check-in system saving the paper as well as the precious time of the visitors in coming **3 years!**

Our mission is to say goodbye to traditional manual visitor logbooks and build fully secured and digitized premises. This will give our clients a **better experience and safer check-in experience**. Our objective is to keep the environment safe by evicting the use of paper completely.

#greenbusiness

For each new customer, we pledge to plant a tree!

Safely welcome visitors with touchless check-ins

Protect your visitors' and employees' health and safety, and make visiting your office touchless.

Speed up check-in process

Getting visitors information and signing documents before they arrive, can make check-ins instant and reduce the number of people waiting in your lobby at once.

Maintain the health and safety of employees and visitors

Minimize the spread of germs and limit the exposure of your entire office by making the check-in process completely digital.

Powerful first Impression

Making your first impression is the last impression with a digital check-in and assuring visitors and employees that their health and safety are a priority in your workplace.

Contact Tracing Application For Every Workplace Post COVID-19

Protect your visitors' and employees' health and safety, and make visiting your office touchless.

Touchless check-in

Enable visitors to check-in by sending them QR codes via email in advance.

Pre-registration

Pre-register anyone coming into your office to gather important info, make sure they're safe to enter.

Alerts & Blacklisting

Blacklist high-risk visitors and send instant alerts to the teams.

Accurate Time tracing

Track and trace exact check-in and check-out time of visitors and employees.

Visitor's Health Screening Questions

Easily ask visitors with custom health screening questionnaires about their recent travel history or current state of health.

Thermal Screening

Scan for body temperature and Logic based alerts.

Touchless Employee Attendance

To avoid biometric attendance systems use QR based staff attendance for more safety.

Visitor E-Pass

Go touchless by assigning E-pass to visitors for a specific duration.

The Current problem

Manual Paper logbooks

Long Waiting Lines

Visitor's Data Privacy

Less Work Productivity

Visitor Authentication

**Did you
Know?**

48%

of the visitors have had a bad
experience at reception
lobbies.

60%

of meeting delays is due to
long queues

80%

of are uncomfortable with
level of security within the
office premises

How Vizitor is different?

- **Android and iOS Support**

Vizitor is deployed for both Android and iOS.

- **Vizitor PASS App for Employees**

Vizitor PASS is a mobile app which act as companion for employees and Visitors to sync in at all times.

- **Web check-in**

Visitors supports check-in.

- **Vizitor's Price**

Price is not what Vizitor focuses on. Rather the only point is to make the offices secure with a very cost-effective check-in system.

How it works?

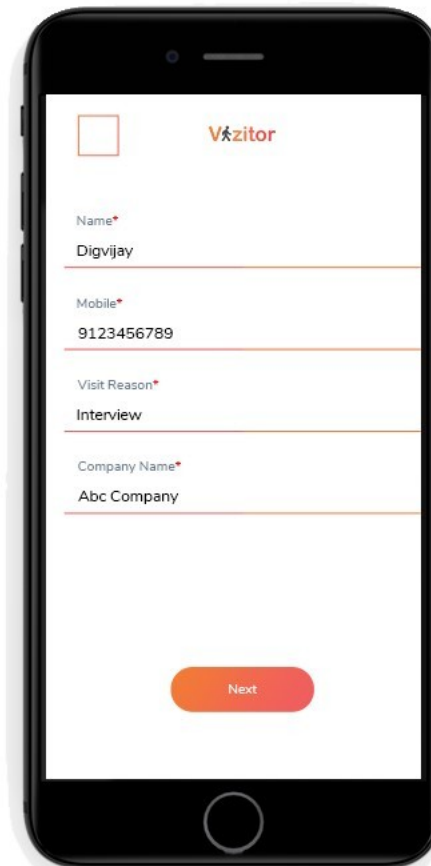

*Why make manual entries
when Vizitor can help you go Digital!*

Use Cases

Offices

Vizitor in offices allows visitors to do self check-in, it notifies the host on completion and sends automatic visitor notifications via Email and SMS.

Hospitals

Vizitor in healthcare facilities helps to provide protection through various screening processes, while keeping facilities, employees and data safe during any pandemic situations like recent Coronavirus Outbreak.

Co-working

Co-working needs a visitor management system to keep a track of every person who enters the workplace, as it has a large number of footfalls.

Salons

The Vizitor in salons enables you to schedule hassle-free appointments, manage visitors data and feedback management, in just a few clicks.

Hotel

Visitor management system for hotels can help them to streamline visitor check-in, reduce time and save paper.

Events

Vizitor offers event managers a centralized system to monitor their operations and speed up the registration process reducing the waiting time.

School

Vizitor in schools provides a safe and secure environment to the schools as it stores and manages all the visitors data in a secure admin portal.
